

## Bookings and Prices

To make a booking simply call or email to arrange a time, place and date, or fill in your details in the next panel and fax this side of the sheet back to us.

MSE now has several staff available to fulfil your booking requests during the school holidays, but times still fill up very quickly - **book early to avoid disappointment!**

*It is a condition of the booking that an appropriate number of your staff members with duty of care remain present at all times.*

1 x 90 minute Science show  
for up to 60 students: \$185+GST

2 x 90 minute science shows  
for up to 60 students per show: \$370+GST

Travel Costs of \$25/hour may apply  
(first hour free)

# Holiday Science!

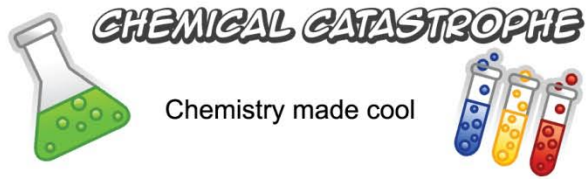

Interactive science that comes to you!

Holiday programs for  
Vacation Care, OSHC  
and Community Centres  
July 3rd - July 18th 2010

# Interactive Science Shows that come to you!

## CHEMICAL CATASTROPHE

Chemistry made cool

Take the coolest chemistry demonstrations ever seen in schools, add 1 slightly insane presenter and stir vigorously for 60 minutes. Result - scientifically verified fun.

**Time:** 60 minutes + set-up and clean-up

**Numbers:** Up to 60 students

### Requirements:

Table, access to water, space for the students to sit, easy access to an outdoors area (for the messier demonstrations)

## CRITICAL THINKING

How easily are you fooled?

A combination of stage magic and stunning optical and audio illusions that will have your students questioning everything. Help your students develop a healthy critical outlook on unusual claims, how we think and the strange behaviour of our own brains.

**Time:** 90 minutes + set-up and clean-up

**Numbers:** Up to 60 students

### Requirements:

Table, access to electricity, space for the students to sit.

## SPUN-OUT SCIENCE

The weirdness of spinning things

A 60 minute exploration of the seriously weird behaviour of spinning objects. How do ice skaters do those crazy spins? How far can you throw a playing card? Can you turn a bucket of water over your head without getting wet (and do you think it would be fun to find out...)?

**Time:** 60 minutes + set-up and clean-up

**Numbers:** Up to 60 students

### Requirements:

Table, access to water, a large cleared space for the students to sit and move around.

*For your peace of mind...*

Mobile Science Education® is owned and operated by Lee Harrison - a qualified, experienced and registered teacher in SA. Lee and all employees have a First Aid Certificate, have completed mandatory Child Safe training and have an up-to date Police Check clearing them for work with children.

Lee is an experienced stage performer and teacher who also ran the Investigator Science and Technology Centre's outreach programs. All of us at MSE are professional nerds, dedicating to spreading the message that smart is the new cool, and it's alright to be clever, passionate about the world around us and committed to learning.
